SUMMARY

Dynamic DevOps Engineer with 4+ years of experience in designing and automating cloud-native infrastructures across AWS environments. Proficient in Kubernetes orchestration for deploying and managing scalable, containerised applications. Skilled in CI/CD pipeline design, IaC (Terraform, CloudFormation), and Linux system administration. Adept at streamlining operations through automation using Python and integrating REST APIs with Serverless functions as AWS Lambda. Successfully implemented AI-driven solutions using Cursor AI agent, Claude and OpenAI to enhance CI/CD efficiency, predictive monitoring, and automated issue resolution— significantly reducing SDLC cycles and manual overhead. Proven ability to align technology with business goals in agile, fast-paced environments

WORK EXPERIENCE

DevOps Engineer, A3 Ideanix Technology Pvt. Ltd.

May 2025 - Present

- In my recent company, I worked as a DevOps Engineer on multiple client projects, including a FinTech application, enterprise CRM dashboards, dynamic web platforms, and social media applications. For the FinTech project, I was responsible for designing and managing scalable cloud infrastructure, automating deployment workflows, building CI/CD pipelines, and maintaining secure production environments to ensure reliable and high-performance application delivery.
- I worked extensively with AWS services, Docker, Kubernetes, Terraform, GitHub Actions, Linux servers, Nginx, monitoring, logging, and infrastructure security. My key contributions included reducing deployment time through automation, improving system uptime and reliability, implementing zero-downtime releases, enabling auto-scaling environments, optimizing cloud costs, and ensuring highly available production systems.
- I also collaborated closely with development and QA teams to streamline release cycles, improve operational efficiency, and accelerate software delivery by following modern DevOps and Site Reliability Engineering best practices, including IAM, least privilege, and zero trust policy.

DevOps Engineer, Techwave

April 2022 - March 2025

- Built and managed CI/CD pipelines using GitHub Actions, Git, and Shell scripting for faster releases.
- Deployed containerised applications using Docker and supported Kubernetes cluster operations, scaling, and rollouts.
- Managed AWS infrastructure, including EC2, Lambda, S3, IAM, RDS, VPC, Route 53, and Load Balancers.
- Configured Linux servers, Nginx, SSL, DNS, reverse proxy, and multi-environment deployments (Dev/UAT/Prod).
- Automated infrastructure provisioning using Terraform and Infrastructure as Code (IaC) practices.
- Implemented monitoring, logging, and alerting using CloudWatch, Prometheus, Grafana, and ELK Stack.
- Improved security through IAM policies, patching, backups, access control, and vulnerability remediation.
- Worked with development and QA teams to resolve production issues, optimize performance, and ensure stable deployments.

SKILLS

- **Cloud Platforms:** AWS (EC2, S3, RDS, VPC, IAM, Lambda, CloudFormation), AZURE, GCP
 - **AI agents:** Cursor AI agent, OpenAI, Claude
 - **CI/CD:** GitHub Actions, AWS CodePipeline, GitLab CI/CD
 - **Configuration Management:** Ansible
 - **Build & Dependency Management:** AWS CodeArtifact, Maven, Nexus Repository
 - **Infrastructure as Code (IaC):** Terraform, CloudFormation, AWS CDK
 - **Containers & Orchestration Deployment:** Docker, ECR, ECS, Kubernetes, Helm, EKS, AKS,
 - **Scripting & Automation:** Bash, Python, Groovy
 - **Database Management:** AWS AURORA/RDS, DynamoDB, MYSQL, MongoDB
 - **Monitoring & Logging:** Prometheus, Grafana, CloudWatch, ELK Stack
 - **Troubleshooting & Debugging:** Log Analysis, System logging, Kubernetes Debugging,
 - **Version Control:** Git, GitHub, Bitbucket
 - **System Administration & Virtualisation:** Linux (Ubuntu, , Amazon Linux, CentOS), Vagrant
 - **Security & Compliance:** IAM, AWS Security Groups, TLS/SSL, HashiCorp Vault, SonarQube,
 - **Web & Proxy Servers:** Nginx for high-traffic web applications, improving load balancing
-

CERTIFICATION BY CORPORATE L&D PROGRAM

- AWS Cloud Certified Practitioner Certificate
 - Terraform IaC Certificate
 - Docker Certified Associate
 - Certified Kubernetes Administrator
 - Course of Computer Concept by National Institute of Electronics and Information Technology (**NIELIT**)
-

EDUCATION

Bachelor of Arts(BA), 2020

Veer Bahadur Singh Purvanchal University

- Uttar Pradesh
-

ADDITIONAL INFORMATION

- **Soft Skills:** Problem solving, Collaborative and Teamwork, Adaptability.
- **Language:** English, Hindi
- **Awards/Activities:** Successfully implemented cloud cost optimization strategies, reducing infrastructure expenses by 35% through resource allocation, auto-scaling, and rightsizing EC2 instances.
- completed projects within deadlines, showcasing strong time management and problem-solving skills.
